GREETINGS !

Meet an architect, turned 3D artist, turned frontend developer!

I have an M.Sc in architecture with distinction. For the last 6 years I have worked as a 3D artist in enterprises ranging from small start-ups to internationally renowned companies. Now I am keen to start a new adventure in the world of digital art mixed with interactivity and stunning user experience.

Other important facts about me would be my passion for sweets and cakes and my love for french bulldogs. I lead a sporty lifestyle, for example I like boxing a lot. I am looking forward to get in touch and to help you create something amazing!

IVANNA SEVKOVYCH
